

Hi, I have been using satellite radio for almost a year now and am extremely impressed with the country-wide coverage and fidelity of the service. I have it both in my car and in my home. I listen to music, weather, news and other things that they offer on a daily basis. I would really hate to see that service interrupted by some lobbying agencies such as the NAB. I urge you to reject the current NAB petition 04-160 in order to continue satellite radio and the trends it is taking throughout the USA with great service.

Sincerely,

Ellis Dawson
